PROFESSIONAL SUMMARY

Software engineer with 4+ years of experience building SaaS products across frontend, mobile, and backend development. Strong expertise in React, TypeScript, and React Native, with experience leading SDK development from scratch, modernizing existing applications, and building AI-powered features.

WORK EXPERIENCE:

BEAMER × USERFLOW

Software Development Engineer I (SDE-1) | 11/2023 - Present

Product focus: Userflow | Remote | *October 2025 - Present*

- Owned and led the development of **Userflow's React Native SDK from scratch**, guiding the team across SDK implementation, web builder integration, customer requirements, delivery, and CI infrastructure.
- Extended Userflow's onboarding infrastructure to React Native, creating a mobile upsell opportunity across **120 existing web customers with React Native apps**.
- Built native onboarding components across iOS and Android with device pairing, live flow preview, and reconnection handling between mobile apps and the web builder.
- Created a **mobile QA delivery workflow** for iOS TestFlight, iOS simulator, and Android APK builds using GitHub Actions and CircleCI.
- Implemented **AI-driven handover** in Userflow's Adoption Agent, evaluating user messages and routing conversations to human support through third party integrations like Intercom and HubSpot.

Product focus: Beamer | Coimbatore, Tamil Nadu | *November 2023 - September 2025*

- Led the migration of the authentication system from JSP to React, improving reliability and UX and driving a 32% **increase in user signups**.
- Modernized the billing system by migrating JSP-based flows to React.js, integrating Stripe and supporting proration, upgrades, and downgrades, improving maintainability and reducing billing-related UI issues.
- Built an **AI-powered content generator** for changelog posts, reducing friction in content creation and achieving ~21% **feature usage**.
- Expanded **NPS backend schemas** and added cron-triggered Google Cloud Functions jobs to improve reporting reliability and operational workflows.
- Resolved 120+ support issues across edge cases, stability fixes, and UX improvements.

MOVATE TECHNOLOGIES

Developer | Chennai, Tamil Nadu | *June 2022 - September 2023*

- Developed responsive web interfaces using React.js and TypeScript for enterprise applications used by 500+ **internal users**.
- Enhanced an AWS Lex chatbot and integrated it with React.js.
- Wrote unit tests and performed impact analysis for the integrated solution.
- Translated Figma designs into responsive web interfaces.

ACHIEVEMENTS

- Won an internal company hackathon, competing against 20 **teams** and earning a **$1,000 prize**.

EDUCATION:

Dr. Mahalingam College of Engineering and Technology | *June 2018 - May 2022*

Bachelor of Engineering in Computer Science | CGPA: 8/10

PROJECTS

AI-Powered Assessment & Content Platform

Developing an assessment authoring product for teachers, students, tutors, and coaching-centre educators using React, TypeScript, TipTap, Elixir, Phoenix, and PostgreSQL.

- Designing organisation-scoped backend resources and storage of canonical TipTap JSON in PostgreSQL JSONB.
- Digitized scanned books using **Chandra OCR** on GPU infrastructure, producing machine-readable text for assessment-content processing and retrieval.
- Developing **GraphRAG-based retrieval** for educational content, exploring relationships between topics and concepts to supply relevant source context for AI-assisted assessment workflows.

Mobile App Intelligence & Reporting

- Built a **Similarweb-style mobile app intelligence tool** to help sales and engineering evaluate prospects, understand their technology stack, and assess integration fit without manually investigating each app.
- Analyzed Android APKs to identify mobile frameworks, installed SDKs, and third-party integrations by inspecting JavaScript bundles, DEX class signatures, and native libraries.
- Generated detailed reports combining technical findings, app-store metadata, and usage or audience estimates, bringing technology and audience information together to support prospect qualification and outreach prioritization.

SKILLS:

Frontend: React.js | TypeScript | JavaScript | Next.js | Astro | React Router | React Query | HTML | CSS | Tailwind CSS | Stylus | jQuery | Shadcn UI | Stylex | CRX (Chrome extensions) | Frontend performance optimization

SDKs & JavaScript Modules: Userflow.js | JavaScript/TypeScript SDK development | ESM | CommonJS | Package bundling | npm publishing | Dependency and peer-dependency management

Mobile: React Native | Expo development builds | Expo Router | React Navigation | React Native architecture

Backend & APIs: Elixir | Phoenix | Node.js | Express | Java | JSP | Hibernate | REST APIs | GraphQL

Databases & Services: PostgreSQL | MySQL | MongoDB | Supabase | Stripe | AWS Lex | Google Cloud Functions

Agentic Development: Claude Code | OpenAI Codex | Chrome DevTools MCP | Figma MCP | Callstack Agent Devices

Applied AI: AI content generation | AI-driven support handover | GraphRAG and OCR

Testing & Quality: Vitest | Unit testing | ESLint | Prettier | Lighthouse

Build & Infrastructure: Git | Pnpm | Npm | Yarn | Vite | Webpack | Docker | Nginx | Monorepos | Changesets

CI/CD & Delivery: CircleCI | GitHub Actions | TestFlight | Android APK | Vercel | Netlify | YAML

Observability: Sentry | Grafana | Elastic logs

Languages: English | Tamil | Hindi | Dhakni |
